EXPERIENCE

UMBC Events & Conference Services Lighting Student Manager

UMBC

08/2024 - 06/2025 UMBC, Catonsville, MD

- As Lighting Student Manager at UMBC Events & Conference Services, I led a team of 30+ individuals, ensuring efficient collaboration and execution. I designed and implemented large-scale lighting, audio, and video networks for campus events, managing setups to ensure seamless production.

UMBC Events & Conference Services Technician

UMBC

01/2024 - 08/2024 UMBC, Catonsville, MD

- Assisted in setting up and operating technical equipment for lighting, audio, and video systems for various large scale campus events. Ensuring smooth execution and technical efficiency.

Nature Specialist

Ward YMCA

05/2023 - 08/2023 Walter Ward Blvd, MD

- As a Nature Specialist at the YMCA, I developed and led a hands-on nature curriculum, teaching 200+ children about ecology, wildlife, and environmental conservation through interactive lessons and activities.

EDUCATION

Computer Science Bachelor's Degree

University of Maryland Baltimore County

05/2025 Catonsville, MD (Tier 1 Honors Research Institution)

- Artificial Intelligence / Machine Learning Track
- Computer Science Bachelor's Degree (graduated)
- Grades: College GPA- 3.31
- Relevant Coursework: Neural Networks, Introduction to Artificial Intelligence, Introduction to Machine Learning, Principles of Computer Security, Design and Analysis of Algorithms, Principles of Operating Systems, Software Engineering, Computer Architecture, Introduction to Data Science, Computer Organization and Assembly Language, Principles of Programming Languages, Data Structures, Discrete Structures, Introduction to Linear Algebra, Introduction to Probability and Statistics.
- Relevant Projects: Basic Linux Kernel, Enhanced Wikipedia Website, Domain Adapted Twitter Bot Detector, AI Based Video game, Sports Betting Neural Network and Random Forest Predictor

TRAINING / COURSES

Artificial Intelligence for All Ignite Program, Python (AI4All)

Utilized algorithms such as random forests, CNN's, & adversarial networks. Developed NLP project with guidance from Industry experts over 18-week course.

SUMMARY

Highly Motivated Computer Science Graduate specializing in Software Development, Artificial Intelligence, Cybersecurity, and Cloud Infrastructure. With practical experience in Python, Java, C++, R, Git, Assembly, and more. Seeking roles where I can leverage my technical expertise and experience to solve complex problems and drive innovative solutions and long-term success.

CERTIFICATIONS

GCE – Professional Cloud Architect

Demonstrates advanced ability to design and manage secure, scalable, and reliable solutions on Google Cloud Platform.

CompTIA Security+ (SY0-701)

Industry-recognized certification demonstrating expertise in cybersecurity, risk management, threat detection, and network security.

CompTIA CySA+ (CS0-003)

Industry-recognized certification validating skills in threat detection, incident response, vulnerability management, and security monitoring using behavioral analytics.

DOD Approved Baseline Certified

IAT Level II, IAM Level I, CSSP Analyst, CSSP Infrastructure Support, CSSP Auditor

SKILLS

C/C++ | Cybersecurity | Excel | Data Structures | GitHub | AI/ML | Java | Jupyter | Neural Networks | Linux | Python | Cryptography | Assembly x86 | R Code | Colab | Reverse Engineering | HomeLab | Cloud | Google Cloud Platform | Web Development
